

CCAP03 – Agile Project Management (AgilePM®) Foundation

Description

This course prepares candidates for the AgilePM Foundation Certificate. AgilePM® provides an approach that offers agility but retains the concept of a project, project delivery and project management. It works alongside more formal approaches such as PRINCE2® and complements quality processes such as ISO90001 and CMMI.

Agile Project Management is based on DSDM Consortium's Atern method, which is the oldest established Agile approach that delivers the right solution at the right time.

By obtaining the AgilePM® Foundation Certificate, you will have demonstrated an understanding of Agile Project Management philosophy, principles, processes, people, products, techniques and guidance applied within a project.

The AgilePM® Foundation examination aims to measure whether the learner can act as an informed member of a project team using AgilePM®.

Learning Objectives

Successful candidates will receive an internationally recognized AgilePM® Foundation certificate, which is administered by the APM Group.
