

Agile Project Management (AgilePM®) Foundation

The AgilePM® Foundation Course provides a robust introduction to the Agile Project Management framework, equipping professionals with the knowledge and skills to manage projects effectively in agile environments.

Aligned with the latest version 3 (V3), this course emphasizes delivering value, agile leadership, and integrating SCRUM practices for enhanced project outcomes.

Course Requirements

- Duration: 3 days of virtual classroom training, plus 10 hours of pre-course self-study.
- Schedule: 8:00 AM to 5:00 PM daily. Evening assignments on Days 1 and 2.
- Examination: 50 multiple-choice questions, conducted on the final day (closed-book; 40 minutes; 50% pass mark).

What you will learn:

Gain a comprehensive understanding of agile project management, including:

- The philosophy and principles underpinning AgilePM®.
- The Agile project lifecycle, including alternative configurations.
- Roles and responsibilities within an Agile project team.
- Key practices such as MoSCoW prioritization and timeboxing.
- Effective planning and control throughout the agile lifecycle.
- Utilizing techniques like facilitated workshops, modelling, and iterative development.

Participants will receive:

- The official AgilePM® V3 Reference Book.
- Pre-course preparation materials.
- Comprehensive Foundation Course Manual.
- Sample Foundation exam questions provided by APMG.
- Additional study aids to support learning

Premier PMI ATP: 2604 PMP / CAPM Professional Development Units (PDUs)
