

# Agile Project Management (AgilePM®) Practitioner

The AgilePM® Practitioner Course builds upon the foundational knowledge acquired in the AgilePM Foundation course, focusing on the practical application of Agile Project Management principles. Aligned with the latest version 3 (V3), this course emphasizes delivering value, agile leadership, and integrating SCRUM practices for enhanced project outcomes.

## Course Requirements

- Duration: 2 days of virtual classroom training, plus 10 hours of pre-course self-study.
- Schedule: 8:00 AM to 5:00 PM daily. Evening assignments on Day 1.
- Examination: Complex multiple-choice exam featuring 4 questions (up to 20 marks each), conducted on the final day. (2.5 hours; open book; 50% pass mark).

## Key Topics

- Roles and responsibilities from the Project Manager's perspective.
- Agile Project Management throughout the lifecycle.
- Effective use of AgilePM products.
- Delivering on time by combining MoSCoW prioritization and timeboxing.
- People, teams, and interactions in agile projects.
- Requirements and user stories management.
- Estimating techniques and project planning through the lifecycle.
- Quality management and risk management in agile projects.
- Tailoring the AgilePM approach to specific project scenarios.

Participants will receive:

- A detailed Practitioner Course Manual.
- Sample Practitioner exam questions provided by APMG.
- Comprehensive study aids.
